

# Pieces of wood

play, build and discover

play &  
discover

from  
Artstraws

## Pieces of Wood is a very natural but very different approach to building blocks.

The pieces are cut from the branches of responsibly harvested trees, the bark is not removed and each set is unique.

Most of the pieces are 2, 4, 6, 8 or 10cm long with parallel ends but they vary naturally in diameter; the set also includes platform pieces and other challenging shapes.

Children quickly learn how to combine the modular pieces to create supportive columns of equal height and by placing platform pieces across the columns they can investigate balance and stability and discover the rewards of “trial and error”.

Imaginative young minds will see endless combinations and possibilities perhaps using the pieces of felt as a roof or floor covering.

**Note:** This product is made from natural wood and pieces of bark may become detached; the product is therefore not recommended for children under 3 years of age.

**WARNING**

Small Parts. Choking Hazard.
